Lucky

Instructions

Listen with headphones and eyes closed. Visualize anything you'd like to achieve through luck. If choosing lottery numbers, imagine a connection to Universal Mind that is whispering in your ear. If creating serendipity, imagine doors opening as soon as you show up, the ideal people meeting you when you need, and finding just the right thing at the right time. Experiment with various visualizations for best results.

Tips For Success

Keep a daily journal and record any objective evidence that you are becoming lucky. Write down things that happen to you on a daily basis that are good, and that you didn't plan.
